CK 22$ MODEL

The CK 22$ offers immediate access to a One Step funded account with specific rules for managing your trading risks and profits.

The Student Phase (Phase I)
This phase is designed to test your ability to achieve goals in a short amount of time.
Trading Objectives: Achieve a 10% profit target during the Student Phase. Complete a minimum of 3 trading days to pass the evaluation. Adhere to the trading rules and loss limits. Upon passing, your entire evaluation period will be reviewed in preparation for your Master Account. The Master Account Once you pass the Student Phase, you will be offered to trade on a Master Account.

Account Violations (Hard Breach)
All CK 22$ Models have trailing drawdown.
Hard breaches are serious violations to our established rules. A hard breach happens when a trader exceeds the maximum daily loss or total drawdown limit, resulting in the immediate closure of the account.

Max Daily Drawdown – 3% (Trailing)
• What does this mean?
The maximum daily loss limit is 3% of your initial account balance/Equity (the highest between the two at market rollover time).
• How is it calculated?
The daily drawdown is calculated daily at 5 PM EST based on your account balance or equity. Your equity must not drop by more than 3% of your initial account balance in a single trading day.
Example:
For a fresh new $25,000 account, the daily drawdown limit is $750. If your account balance or equity drops below $24,250, you will exceed your daily loss limit.

Trade Duration

The rule is about the duration of your trades. For a trade to be eligible for withdrawal, it must remain open for at least 10 minutes.

Example: If you open a trade at 8:00 AM, it needs to stay open until at least 8:10 AM. - If you close the trade at 8:05 AM, the profits from that trade will be ineligible for withdrawal.

This rule ensures that trades are not just quick scalps but have a meaningful duration.

Max Total Drawdown – (6% (of the initial account size)

• What does this mean?
•
The Maximum Loss Limit is the total amount your equity or balance cannot go below. Violating this rule is a hard breach and will lead to the closure of your account.

Your Daily drawdown limit follows your equity value at the end of each trading day and remains 3% of that value While Max drawdown is fixed at 6% of the initial account size.

Understanding the Maximum Loss Per Trade Rule

If your floating profit and loss (PnL) drops below -3% of your account balance at any moment, the account will be permanently closed. This rule enforces strict risk management and prevents excessive losses.

For example, on a $25,000 account, if your combined open trade losses reach -$750 (-3%), the account will be immediately closed.

Minimum trading day requirement for Instant CK 22$ accounts

Traders on one step CK accounts must complete at least 3 trading days before requesting a reward. These trading days do not have to be consecutive, but to be considered a trading day there must be a minimum profit of 0.5% of initial balance generated.

Consistency Rule - (For Funded stage)

• What is it?

The consistency rule ensures steady and sustainable profits over time. It states that no single trading day can account for 10% or more of your total profits during a payout period.

If you make $375 in one trading day, your total profits must reach at least $460 to be eligible to request a payout. You cannot request a payout until the highest profit day falls below 10% of the total profits for the period.

What Happens if I Violate the 10% Rule?

• Will my account be terminated?

No, violating the 10% rule will not result in account termination. However, you will be unable to request a payout until your highest profit trading day is below 10% of your total profits.

• What should I do next?

Continue trading and generating profits until your highest profit day falls below the 10% threshold. Once this happens, you will be eligible to request a payout again.

Rewards:-

Profit Split

Traders receive an 80% profit split as standard.

Example:

If a trader earns a profit of $100 and requests a payout, they will receive $80 as their total payout.

Reward Cycle

We offer bi-weekly payouts, allowing traders to withdraw their profits every 14 days. Simply request a reward, and your earnings will be processed accordingly.

What account sizes are available for the CK 22$ plan?

The only available account size for the CK 22$ plan is **$25,000** and it costs just **$22** to get started.

Does the CK 22$ account expire?

Yes, the CK 22$ account will automatically expire 45 days after you place your first trade. After 45 days, the account will be blocked and you will not be able to trade on it or request withdrawals

What is the minimum profit I can withdraw with the CK 22$ plan?

The minimum withdrawal amount for the CK 22$ account is $495. This means you must accumulate at least $495 in profit before you can request a withdrawal. Withdrawals below this threshold will not be processed.

What is the maximum profit I can withdraw with the CK 22$ plan?

The maximum withdraw-able profit for the CK 22$ account is capped at $1000 for the entire life of the account. This means that the total profit you can withdraw is limited to 4% of the initial account balance.

Can I buy multiple CK 22$ accounts?

Yes. Each user can purchase upto three CK 22$ account.

Additional Guidelines (BASIC):-

WHAT ARE THE IP ADDRESS RULES FOR TRADING ACCOUNTS ?

For the security and integrity of your trading journey with CK Funded, it's important that the IP address region used during your Evaluation stages (Phase 1 and Phase 2) and for accessing your Master trading account remains the same. This means:

- **Consistency is Key:** The IP address region from which you purchase the Evaluation, and log into your Phase 1, Phase 2, and Master trading accounts should match.
- **Verification for Changes:** If our Risk Team notices a change in the IP address region, they may contact you for confirmation. You might be asked to provide proof of your location, such as a plane ticket, passport stamp, or a live video from your current location.
- **Travel Notification:** If you plan to travel and trade from a different region, please inform our support team in advance. This helps us understand your situation and prevents any unnecessary interruptions in your trading activities.

This rule helps safeguard your account and ensures compliance with our trading standards.

ACCOUNT MISUSE OR UNAUTHARIZED ACCESS ?

Account misuse occurs when someone other than the registered account holder engages in trading activities. Our system continuously monitors for unauthorized access, such as the use of different IP addresses by
Non-account holders. If such activity is detected, the account will be flagged, and an automated response will be issued. Clients who have engaged in prohibited trading practices in violation of our terms and conditions will have their accounts breached. As a result, the account will be terminated, and the account holder will no longer be permitted to participate in our funding program. **Please note that all trading activities must be conducted solely by the registered account holder to ensure compliance with our terms and conditions.**

CK Funded shall be entitled to review the client's account without notice at any time, withdraw any profits, and charge any costs which it deems, in its sole discretion, to have been inappropriately gained. CK Funded shall not be liable for the cancellation of any transaction or profits or in the event of any damages or losses which may result from the suspension, closure, or unwinding of transactions.
THE FOLLOWING ARE RESTRICTED TRADING STRATEGIES, WHICH INCLUDE BUT ARE NOT

LIMITED TO THE FOLLOWING. • Scalping (High-Speed Trading)

- Use of Expert Advisors or "robots"
- Stacking Trades

"Scalping (High-Speed Trading)" is a form of trading strategy through which the Client performs and/or tries to perform numerous transactions on small price changes (5 pips average) or in very short timeframes (closing a trading position within 5 minutes of opening). This also includes holding opposite "hedged" positions for an indefinite amount of time and then closing, or partially closing, the positions within a short period of time from each other.
If the CK Funded notices any Scalping activity or other high-speed trading activity, the trading account of the Client shall be disabled without prior notice. Expert Advisors are automated trading software that executes trades without manual intervention. Under such circumstances, CK Funded shall be entitled to review the client's account without notice at any time, withdraw any profits, and charge any costs which it deems, in its sole discretion, to have been inappropriately gained. CK Funded shall not be liable for the cancellation of any transaction or profits or in the event of any damages or losses which may result from the suspension, closure, or unwinding of transactions.

What is stacking trades?

Stacking trades is the practice of opening multiple positions simultaneously or in quick succession to artificially increase risk exposure. (*PS: Only prohibited on the funded phase)* Why is it prohibited?

This strategy can manipulate risk limits and create an unfair advantage, making it difficult to assess true trading skill.

How to avoid violating this rule ?

To maintain fair risk exposure, traders may execute trades in 10-minute intervals. Opening multiple positions within a shorter timeframe is prohibited and will result in violations of trading rules.

Ensuring Withdrawal Eligibility with CK Funded

At CK Funded, we have zero payout denials—just make sure you meet the necessary criteria to be eligible for a payout. If you've ever wondered how to ensure your withdrawals are eligible, here's a detailed explanation.

To be eligible for withdrawal, you need to meet three key criteria:

1. Lot Size Consistency

2. Trade Duration

1. Lot Size Consistency

Lot size consistency means maintaining a consistent lot size throughout your trades on the funded account. You must use the same lot size that you started with, but there is some flexibility to adjust this lot size. Specifically, you can increase or decrease your initial lot size by multiplying your **average lot size** by 2 (to increase) or by 0.5 (to decrease).

Understanding Your Average Lot Size

To calculate your average lot size, use the following formula:

Average lot size = Total lot size / number of trades **Example Calculation:**

Let's say you started trading with 0.03 lots, and you've taken 8 trades, each using 0.03 lots. Here's how you would calculate your average lot size:

Step 1: Calculate the total lot size. 0.03 x 8 = 0.24

Step 2: Calculate the average lot size. 0.24 ÷ 8 = 0.03

Therefore your average lot size is 0.03. This formula gives you the average size of the lots you've used across all your trades.

Increase/ Decrease your lot size while maintaining Lot Size Consistency: To adjust your lot size while

staying within the lot consistency rule, you

need to multiply your average lot size by 2 to increase it, or by 0.5 to decrease it.

Increase Your Lot Size:

Multiply your average lot size by 2. 0.03 x 2 = 0.06 **Decrease Your Lot Size:**

Multiply your average lot size by 0.5. 0.03 x 0.5 = 0.015

This means you can adjust your lot size within the range of 0.015 to 0.06. Any lot size you use outside of this range will be considered ineligible for withdrawal.

TIP: Make sure to follow this formula closely to avoid any issues with lot size consistency. It may take some time to fully grasp this concept, so don't hesitate to review it multiple times until you're confident.

2. Trade Duration

The second rule is about the duration of your trades. For a trade to be eligible for withdrawal, it must remain open for at least 10 minutes.

Example:

- If you open a trade at 8:00 AM, it needs to stay open until at least 8:10 AM. - If you close the trade at 8:05 AM, the profits from that trade will be ineligible for withdrawal.

This rule ensures that trades are not just quick scalps but have a meaningful duration.

Conclusion

By following these rules—ensuring lot size consistency and meeting the trade duration requirement — you can guarantee that your withdrawal requests will be processed smoothly.

Even if your account has a large balance, only the trades that meet the eligibility criteria (lot size consistency, trade duration, and the minimum number of eligible trades) will be considered for withdrawal. This ensures fairness and adherence to the trading rules.

We encourage you to study these rules carefully to ensure your success. We’re committed to supporting your trading journey, and by adhering to these guidelines, you can confidently look forward to receiving your payouts.
Good luck with your trading, and thank you for choosing CK Funded!
LOT CONSISTENCY
The Lot Consistency Rule is a policy implemented by CK Funded to ensure that traders maintain consistent trading behavior over a specified period before they can make a withdrawal from their trading accounts. This rule helps us manage risk and ensure that traders are not engaging in erratic or high-risk trading practices that could jeopardize the firm's capital.
Purpose

The primary objectives of the Lot Consistency Withdraw Rule are to:

1. Promote disciplined trading: Encourage traders to follow a consistent trading strategy.
2. Mitigate risk: Reduce the likelihood of significant losses due to inconsistent or impulsive trading behavior.
3. Ensure fairness: Provide a standardized measure for withdrawal eligibility, ensuring all traders adhere to the same criteria.

Rule Criteria

Lot Consistency Rule calculates the average lots of all trades, to find the 2 top and the 0.5 bottom limit of the lots.
Example 1: Compliance

- Trader A starts trading with 1 standard lot per trade.
- Trader A continues to trade with lot sizes with average lot 1.5 lot, and the threshold of the lot consistency is top 2 times, and bottom 0.5
times, ranging from 3 to 0.75 standard lots.
- Trader A makes 10 eligible trades out of 15 trades, within 3 to 0.75 lots during this period.
- Result: Trader A has 10 eligible trades for a withdrawal, as they have maintained lot consistency within the allowable deviation and met the trade frequency requirement.

Example 2: Non-Compliance • Trader B starts trading with 1 standard lot per trade.

- Within the payout cycle active days for 5 days, Trader B continues to trade with lot sizes with average lot 2 lots, and the threshold of the lot consistency is top 2 times, and bottom 0.5 times, ranging from 4 to 1 standard lots.
- Trader B makes 0 eligible trade out of 15 trades, within 4 to 1 lots during this period.
- Result: Trader B is not eligible for a withdrawal, as they have not maintained lot consistency within the allowable deviation, no eligible trades and have not met the trade frequency requirement.

PS: Any trades that's outside the range, will be counted as ineligible trades. And will not be included for calculation for the withdrawal. And for those ineligible trades, it could be withdrawn if somehow in the future the trades becomes eligible. For the withdrawn trades, will not be calculated anymore, and will be excluded from the eligible trades profit sum calculation.
TRADE OPEN POSITION
When a trader request a withdrawal, trade open duration must be exceed 10 minutes.

DO YOU OFFER SWAP FREE ACCOUNTS?
No, for beginners and CFD traders, avoiding swap fees in forex is straightforward: **Close all positions before the daily rollover time, typically at 23:59 EST. Important Note:** Traders are permitted to hold positions overnight and over the weekend with both your Challenge and CK Funded Accounts. However, **swap charges will apply to these positions and will count toward your daily loss calculation.**

ARE TRADE COPIERS ALLOWED?

No, trade copiers are not permitted. We aim to ensure that all trading activity is conducted by the account

holder.
RULES REGARDING TRADE COPIERS?

1. **Prohibited Use**: Any form of automated or manual trade copying, including the use of third-party trade copier tools or software, is not allowed.

2. **Account Holder Responsibility**: All trades must be executed directly by the account holder without the assistance of external tools or individuals.

3. **Violation Consequences**: Accounts found to be in violation of this rule will be immediately terminated. Refunds for purchase payments will be processed in accordance with our refund policy, and the account holder will be permanently banned from accessing our services.

4. **Monitoring and Enforcement**: Our risk department actively monitors accounts for prohibited activities. If any suspicious activity is detected, the account will be subject to further investigation, and appropriate action will be taken.

We are committed to upholding the integrity of our platform and ensuring that every user has a fair opportunity to succeed. Thank you for your cooperation and understanding.
IS WEEKEND HOLDING ALLOWED?
Yes, you can. Weekend holding is allowed, providing you with more time to keep your trades open if needed.

Additional Details

- Important Updates: Please monitor our website or Discord for announcements regarding trading parameters, updates, or system changes.
- All calculations include closed trade profits/losses, floating positions, swap fees, and commissions.
